Team McCock's Storyboards

Ryan Malone's Slide

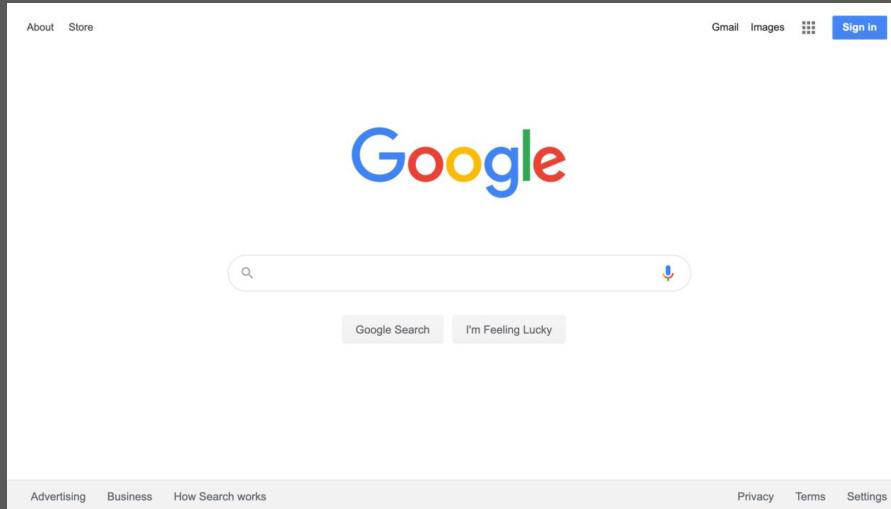

Rufus Lewinsky is a student at the University of South Carolina. He is a sophomore, so he lives off campus and commutes to school daily with the car that he brought with him from home. Many times, all the parking spots near campus are full!

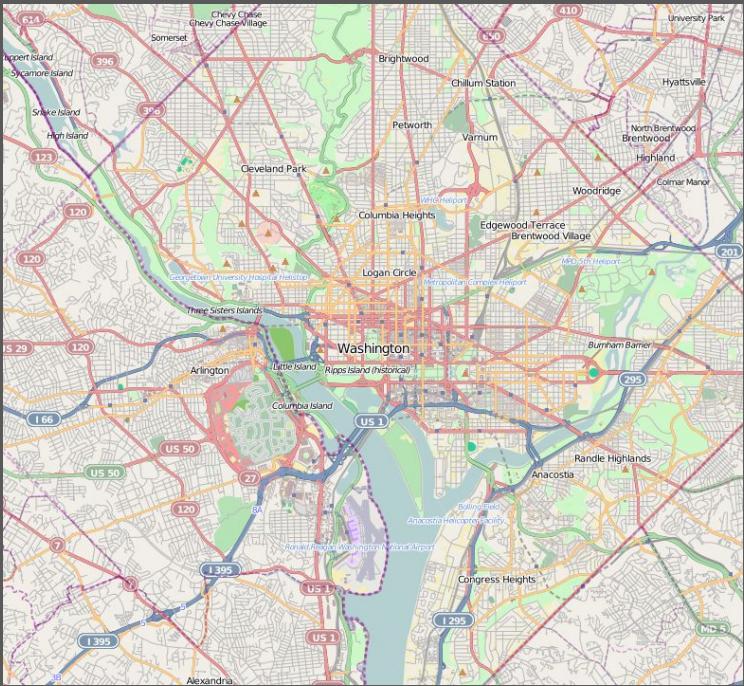

Rufus's large minivan isn't very easy to park, and when he is late for class he will park just about anywhere that he can, including in fire zones, in reserved spots, or even in parking garages that he doesn't have permits for. This has led Rufus to getting tons of tickets and he's even had his car towed.

Ryan Malone's Slide

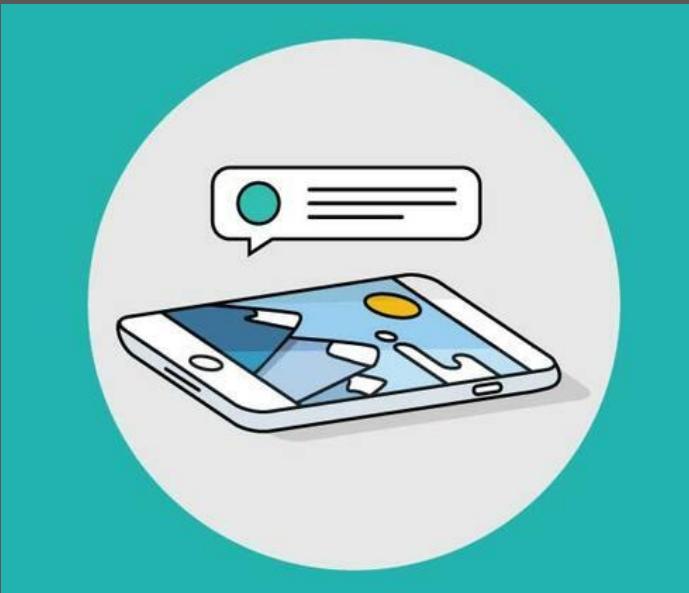

Rufus knew that he couldn't park anywhere he wants anymore. He was getting too many tickets and had his car towed too many times, but he needed a solution. Rufus had to be able to easily find a parking spot, navigate to it, and park in it quickly and easily so that he could get to class on time and finish his school work. He decided to talk research solutions and found a new app that showed where available parking spots were around Columbia.

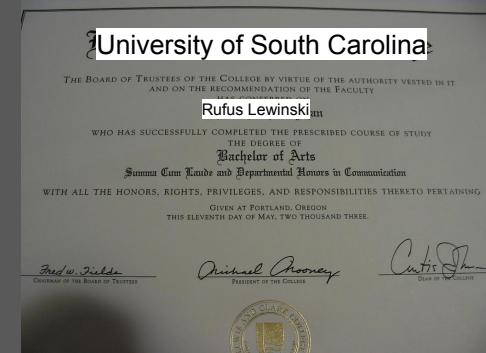

Google Maps

This new app showed the entire city of Columbia and made it easy to see where there was parking. The map showed how many spots were available in each lot, along with when busy times in the lot normally were. It also allowed Rufus to easily navigate to the correct available lot with a click of a button!

In addition to being able to see where there were available parking spots, Rufus was also able to pay his parking meter directly from the app so that he wouldn't get towed or receive any more parking tickets. The app was also able to notify him whenever there were spots available or when he was running out of time on his meters. This helped Rufus stay on top of managing his time and parking spaces.

After that day Rufus used the parking app he found every single day. He quickly found parking spots on most days that he went to class and was even able to plan a schedule around when to go to different parking lots in order to make a spot. He didn't get a single ticket for the rest of the year, was able to keep his own money, and also attended all his classes without being late!

Ryan Aycock

Michael J Hamel is local heating and air conditioning installer in Columbia, SC

Ryan Aycock

Michael was just recently hired to install and maintain A/C on UofSC campus.

Ryan Aycock

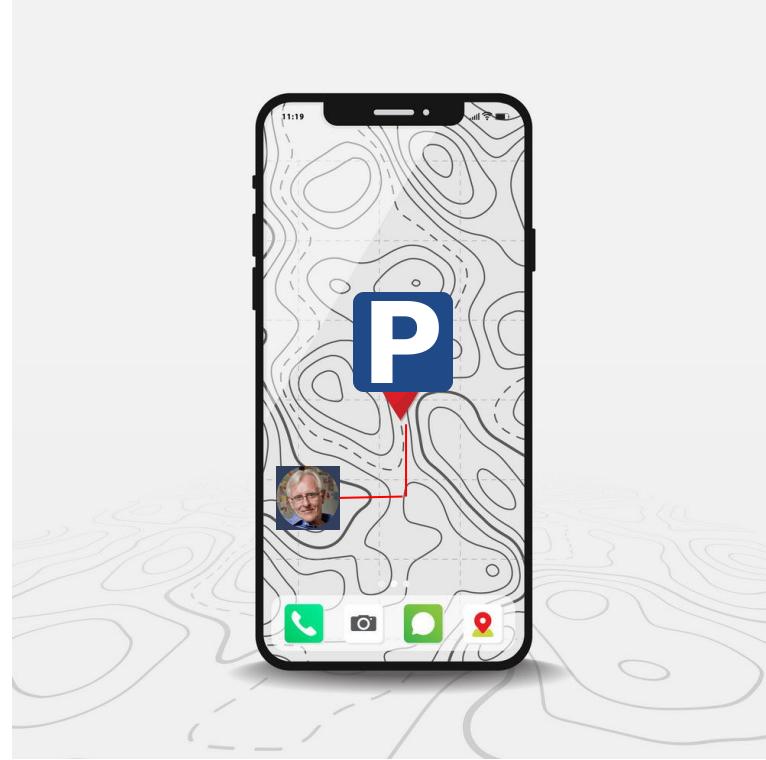

On Michaels first day of installation he was running late and couldn't find parking!

Luckily Michael downloaded the SC parking finder app before his first day.

Ryan Aycock

He found parking that was only 2 minutes away from the A/C unit he needs to work on.

Ryan Aycock

Michael made it to the A/C unit on time and gets to keep his job.

Charles Stello

David D West wakes up at 6:30 AM every morning to get ready to go to school and teach his middle school english class

David leaves at 7 AM in his little Honda Beat zooming to the school of his employment
Charles Stello

Charles Stello

Depending on how kind the Columbian Traffic is to him he will arrive at his school at 7:15-ISH however due to the super old nature of the school all of the parking lots are taken up by school busses or potholes! Which would be detrimental to his little beat's life. He needed to find quality parking nearby that could support his ridiculously small car. If he came in late again he would surely be fired!

Let's Get You Parked.

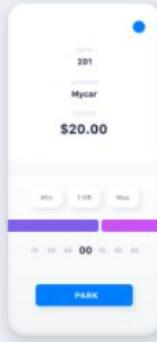

Download the App

Create, register, & verify your account.

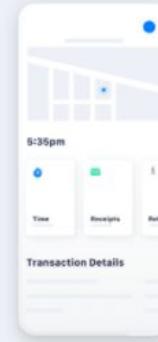

Find Your Zone

Look for the unique zone number
on Passport Parking signs and decals.

Pay

Enter your session information
& choose a payment method.

Manage on the Go

Receive alerts & send email receipts
of your parking session.

Luckily his fellow colleague and friend Dave P East suggested that he download the new local parking app! An app that allows him to find parking that is not only available and cheap but also be able to support his **incredibly small car** he couldn't possibly be compensating with how small it is.

Charles Stello

To his delight the app worked! He was able to find parking, quickly in fact! His little baby car slept soundly while David D West taught the next generation.

Charles Stello

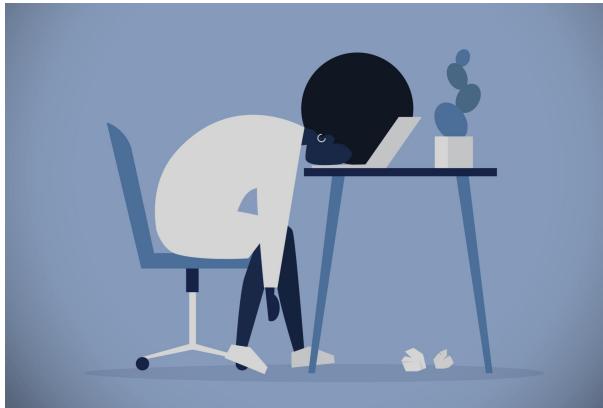

After a not so long day of teaching he hops back in his little car and pays for parking through this wonderful little app. He then zooms back home to do it all again the next day!

Tonica Acosta is a software engineer at Columbia, SC and commutes to work everyday. She's a hard worker and likes to get every task assigned to her completed before the end of the day.

Because downtown Columbia is filled with students and other people trying to find parking, Tonicha struggles to find a spot for her own and it's been affecting her work. She either has to wake up earlier than she would like to find a spot or work from home, which she doesn't like.

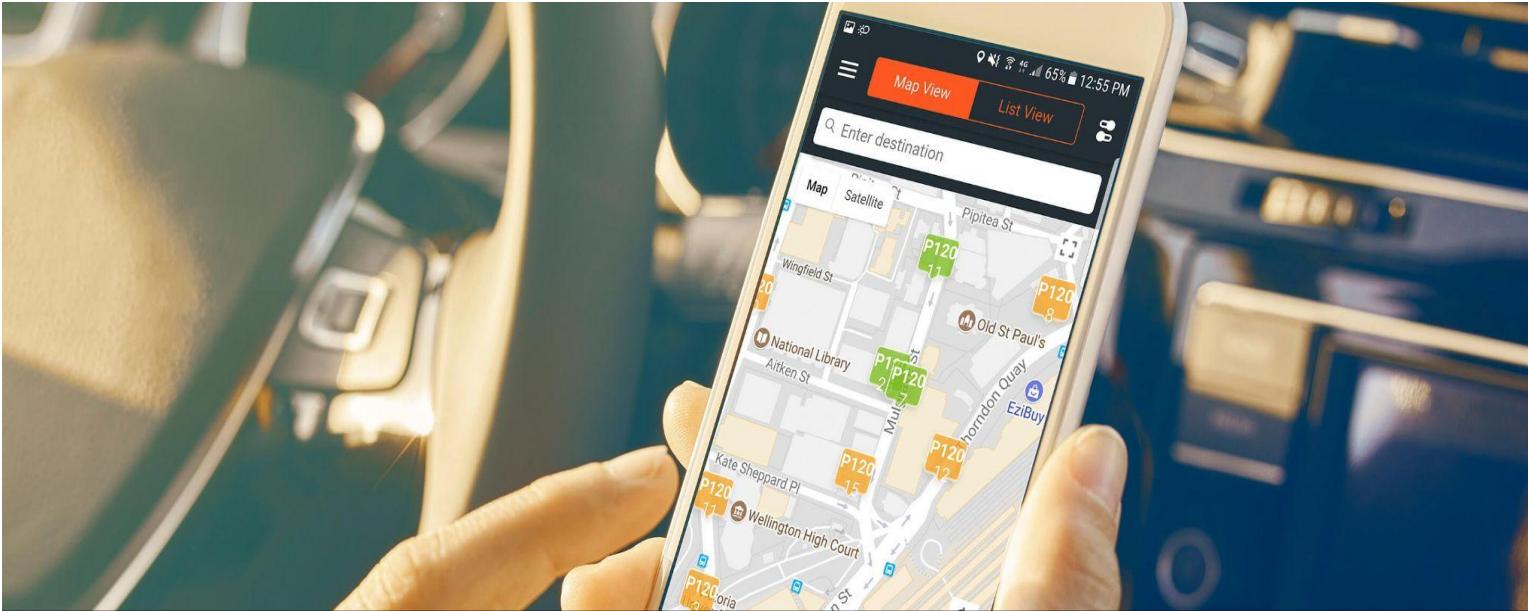

The stress she's been suffering from finding to find a spot has caused her to feel burnt out and she hasn't been able to get any of her workload done.

After many tasks not completed she had a meeting with her supervisors and they suggested to using the new parking space app in order for her to be more efficient at work.

Goutham Gopal

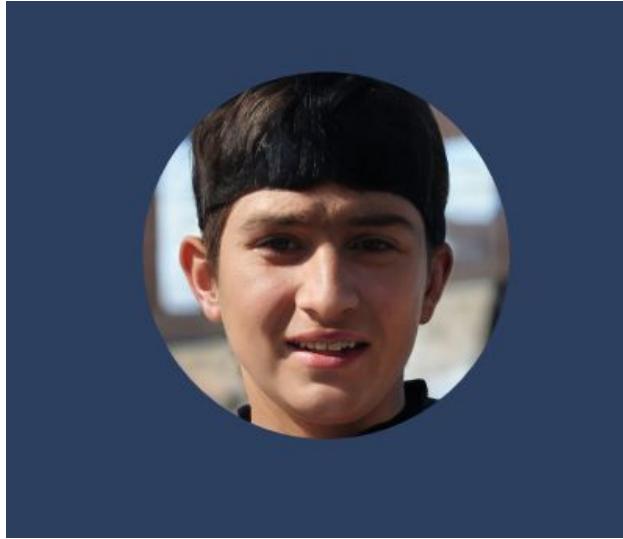

Tonicha found an app that showed her available parking spaces in her area and she no longer has to wake up earlier than she needs to in order to find a spot to park. Along with being able to find a parking spot, the app allows users to see if whether or not any spots are full or if there is any traffic around the area as well.

Every since she downloaded the parking space app she's been happier than ever. She can finally get her work done on time and wake up whenever she would like to.

Timothy Nelson is a 38 year old man who lives in Columbia and works as a Software Engineer. He wakes up and drives to work around 7 AM.

Timothy has problems with his knees, so he always drives to work early. Even then, Timothy is still late to work because of how long it takes for him to find a parking spot in the morning and then walk from his spot to work. The area is very populated and it is hard to find a parking spot.

Being late to work stressed Timothy out and it really affected his life at work. His mornings were hard on him and that caused him to do poorly on projects with his coworkers.

Timothy got in trouble a lot for being late to work. He spoke to one of his coworkers to find a solution and they recommended them this app that finds parking spots for you and navigates you to it!

Timothy started using the parking finder app, and he hasn't had any trouble finding open parking spots.

Timothy's life at work since he starting using the app to find parking has been much better. He always gets to work on time and doesn't stress himself out first thing in the morning trying to find a parking spot. He loves the app!
